

Czech-Iceland workshop
on ecosystem services

Ecosystem services and sustainable development: integrating experiences from different regions and scales

national assessments
governance and behavioural change
forest ecosystem services
urban environment
& experimental role board game

20&21

november 2014

Global Change Research Centre, Academy of Sciences of the Czech Republic cordially invites you to attend the Czech-Iceland bilateral workshop on ecosystem services. The workshop presents experiences with the application and implementation of ecosystem services framework primarily in the Czech Republic and Iceland, but also with host contributions from neighbouring countries and regions (Slovakia, Poland, and Hungary).

The aim of the workshop is to discuss ecosystem services in the context of sustainable development and provide further recommendations and steps required for broader application and implementation of this concept in decision-making. Presentations and panel discussions will enable sharing experiences with the assessment of ecosystem services and the use of this approach in the sustainable governance of ecosystems in different regions and at different scales. The workshop is focusing on multiple aspects of ecosystem services, including global context, national assessments and strategies, forest ecosystem services and ecosystem services in the urban environment. Experimental role board game focusing on a critical ecosystem service of pollination will actively involve participants of the workshop.

presenters and hosts:

Jón Örvar G. Jónsson / School of Engineering and Natural Sciences, University of Iceland, Reykjavik
David Vačkář, Jana Frélichová, Pavel Cudlín / Department of Human Dimensions of Global Change, Global Change Research Centre (CzechGlobe), Academy of Sciences of the Czech Republic
